# So, you want to Craft Your City?

Here is everything you need to know!

The 'Craft Your City' Competition is asking any school aged children to share their ideas and help design what the future of Cardiff could look like, with a focus on preserving and promoting green spaces.

Show Cardiff Council your passion and bring new life to the city.

The challenge is to use Minecraft Education to redesign an area of land located behind the National Museum in the heart of the city centre, with the winner influencing the repurposing of the land.

You will be provided with a geographically accurate representation of the site where you can create your own world and experience,

Your ideas are so important so there are no limitations, as long as it fits within the space in the world.

You can apply to the competition as a team with your friends or enter on your own. When the competition closes, the designs will be judged and a winner will be chosen by Cardiff Council.

There will be prizes and a chance to have your idea built in the real world of Cardiff!

Remember:

- Enter the competition on your own or with friends
- Use the space within the Minecraft world to build your ideas
- Get creative and let your ideas run free – it could be a rollercoaster or a nature garden or an ice-skating rink! Any ideas are accepted!
- Think of what you would like to see in Cardiff City in the future
- The city is for everyone so try to remember the space should be available to anyone who wants to use it
- Have fun and enjoy!

How to Apply

1. After reading this information pack, contact cardifftechnocamps@gmail.com with any queries
2. Download the world from the "Craft my City" folder – See our Importing and Exporting Worlds Document.
3. Create your ideas in the Minecraft World
4. Complete either the individual Competition Form or the Team Competition Form

The closing date is Friday 26th February 2021 at 5pm. Make sure your world is ready and you have completed the competition form by then!

Shortlisted teams will be notified on 5th March 2021.
